

Heat-Treated Glass Waiver

Releasing Window Cleaner from Any Liability for Scratches on Heat-Treated Glass

(Heat-treated glass includes both fully tempered and heat-strengthened glass.)

Due to widespread problems related to poor quality heat-treated glass, **Hawk Wash Professional Window Cleaning** will not be liable for any scratches to any heat-treated glass.

It is accepted and understood by all parties that properly used razor blades and scrapers are standard tools and techniques for post-construction window cleaning and can safely remove limited amounts of construction debris (plaster, paint, texture, tape, stickers) from quality glass without scratching the glass surface.

Furthermore, it is accepted and understood by all parties that razor blades and scrapers will be employed on all post-construction window cleaning done by **Hawk Wash Professional Window Cleaning** to remove construction debris from glass surfaces.

If the Builder does not choose to have **Hawk Wash Professional Window Cleaning** use razor blades or scrapers, Builder must cover all glass during the entire construction process, thus protecting the glass from any construction debris and eliminating the need for **Hawk Wash Professional Window Cleaning** to use razor blades and scrapers to clean glass.

This clause must be included on all contracts. If this clause is not acceptable, there is no contract between **Hawk Wash Professional Window Cleaning** and Builder.
